DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

507/509 South Washington Street is a two and a half story four bay by two bay frame double house, covered with white asbestos shingles. The house, having double center gables, has two story wings on the rear, and faces west on S. Washington St. It has a stone foundation and is painted white with green trim.

A four bay porch with a bracketed shed roof and plain frieze supported by turned posts extends across the front elevation. The porch has fence railing and wooden floor. On the south elevation of the wing is a flat roof addition with a deck above it, having a turned post railing. Two bulkheads are on the east elevation of the wing.

Windows are evenly spaced on the front of the house. On the first and second floor, they contain 2/1 light sash while the side and rear windows contain 2/2 light sash. All of them have wide board framing. Two pairs of double 2/2 light sash windows divided by wide muntins are on the south elevation. The front attic gables contain pointed arch windows, having 2/2 light sash conforming to the enframements.

The main entrances are in the end bays on the front elevation. The doors have vertical panels in the lower half and beveled glass in the upper half; a one light transom is above each of them.

A gable roof with two center gables covers the main section; it has drop pendants in the corners and a box cornice, a lower gable roof with, the ridge perpendicular to the street is on the wing. The roofs are covered with asphalt shingles. Two brick chimneys are in the center of the main roof and a chimney is on the east end of the wing.

Outbuildings: The house has a well tended yard and garden. Matching vertical board garden houses with windows on the sides are behind the house. Stables are found at the Lodge Alley end of the property.

BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

This frame duplex , now covered with asbestos shingles, is four bays wide, two bays deep and two and a half stories high. It has a flat front with tall sharply pointed gables piercing the steep gable flank roof. An almost identical duplex (HA-1139) is located a block south of it. Both of the houses have front gables with Gothic arched windows and two story rear wings.

All along S. Washington St. are well maintained mid to late 19th century frame dwellings, relating to each other in size, scale, style and material. Many of them are gabled Carpenter Gothic cottages on grassy lots that extend to the alleys behind them; built as one and two family dwellings, most of them retain that scheme of occupancy. However, because Harford Memorial Hospital is one block west, the neighborhood has become vulnerable to the intrusion of buildings relating to the medical profession. Displacing the old buildings and their occupants, these new buildings and building uses discourage buyers who are initially attracted to the cozy and homogeneous appearance of this part of Havre de Grace but fear it is changing.
